

HorizonScan

Global Food Integrity and Risk System

Original thinking... applied

HorizonScan can help you keep ahead of the game by daily monitoring of emerging, new and novel issues in the commodities you use, wherever you might source them.

The system can also aid with the data needed to complete your vulnerability assessments for BRC in the prevention of food fraud from adulteration, substitution, fraudulent documentation to expiry date changes, production in unapproved premises, production with inspection and unsuitable means of transport.

For supply chain managers with multiple ingredient responsibilities and complex international supply chains, or companies looking for new supply options, this system enables you to conduct top line investigations and be alerted to issues very quickly.

With a global database of raw material and commodity issues across all food integrity areas running from 1999, HorizonScan can help put your mind at rest when you need to illustrate proactive monitoring of supply chain issues, be it fraud and authenticity concerns, pesticide or veterinary drug residues, environmental and other contaminants, microbiological problems or allergens.

- Regular email alerts related specifically to your commodity interests so no need to look every day if time is of the essence
- Searchable summary of all problems in individual commodities at an international level
- Official sites of 63 countries with over 90 independent sources scanned daily
- Links to original data sources
- Historical database of known supplier problems
- Detailed breakdown of fraud and authenticity issues pre-dating horsegate by several years

Original thinking... applied

“I came across ‘HorizonScan’ in my search for a better answer and have been singularly impressed by the world wide scope of this simple to use package and the timely relevance of the reports I receive. I believe this helps me satisfy my requirements under BRC 7 5.4.1 & 2. The staff who work on this program could not have been more helpful in assisting us to set it up and in tailoring the outputs to be directly relevant to the raw materials we purchase. I am happy to recommend this product to fellow quality professionals who want to be aware of problems with the ingredients they buy, as they are discovered.”

Toby Cusworth FIFST, Director LFI (UK) Ltd
